Board Meeting
June 14-15, 2005
Agenda Item 23
Attachment 2b

STATE OF CALIFORNIA

CALIFORNIA INTEGRATED WASTE MANAGEMENT BOARD

Base Year Modification Request Certification

Part 2: Generation Study - Includes Extrapolation of Residential or Non-Residential Diversion Data

To request a substitution for a previously approved base year used in calculating the diversion rate for your jurisdiction, please complete and sign this form and return it to your Office of Local Assistance (OLA) representative at the address below, along with any additional information requested by OLA staff. When all documentation has been received, your OLA representative will work with you to prepare for your appearance before the Board. If you have any questions about this process, please call (916) 341-6199 to reach your OLA representative.

Mail completed documents to:

California Integrated Waste Management Board Office of Local Assistance (MS - 25) 1001 I Street PO Box 4025 (mailing address) Sacramento, CA 95812-4025

General Instructions:

Please select the **ONE** choice below that best explains your request to the Board.

- 1. Use a recent generation-based study to calculate our current reporting year generation amount, but not officially change our existing Board-approved base year.
- X 2. Use a recent generation-based study to officially change our existing Board-approved base year to a new base year.

The shaded cells on these sheets are protected. If you have problems using these sheets, please contact your Office of Local Assistance representative by calling (916) 341-6199

Section I: Jurisdiction Informatio		ification			
All respondents must complete this section I certify under penalty of perjury that the knowledge, and that I am authorized to	e information			ect to th	ne best of my
Jurisdiction Name		County

E-Mail Address	I			ı	

Section II: Information for New Generation-Base	d Study
Attach additional sheets if necessary—reference	e each response to the appropriate cell number (e.g.,
Note: New base years must be representative of a ju	urisdiction's disposal and diversion.
Current Board-approved existing base year:	2. Proposed new generation-based study year:
1990	2002
3. Explain how the proposed generation study year i	is representative of average annual jurisdiction disposal and

This new generation number reflects the current disposal and the diversion practices in the year 2002. The number of residents and commercial businesses in the jurisdiction has grown considerably. As a result, the amount of C&D waste has also increased. Eight new C&D facilities operate in San Diego County since 1991 and one of the exisiting ones started recycling inert materials in 1995. The Department of Public Works - Roads Division began several waste diversion programs since 1990 as have the major landfills in the County. This dynamic change in the jurisdiction makeup was not accurately reflected in the initial study conducted in 1990.

Diversion rate calculated using existing base year	a.	35	%	Diversion rate calculated using new generation-based study	b. 5	50	%	
For existing base year pounds/person/day based on generation		9.0		For new generation based study pounds/person/day based on generation		13	3.0	
Residential Non-Residential generation 38 % generation		62	%	Residential Non-Res generation 16 % generation			84	%
Population existing generation-based study		398,7	_	Population new generation-based study			454,9	00

5. If there is an increase from 4a to 4b, please explain how the new diversion rate is consistent with your current diversion implementation efforts. If the proposed new generation tonnage results in an increase in your pounds/person/day, please explain how this is consistent with your current diversion implementation efforts and provide examples (e.g., change in jurisdiction's demographics).

The County unincorporated experienced huge growth in construction activities between the time of the original base year and the new base year. New programs were put in that diverted construction and demolition waste that was not adequately accounted for by the CIWMB Adjustment Method. The increase in construction added to the overall generation and the accompaning diversion activities were not accounted for in the original base year study. Eight new construction and demolition recycling facilities that process wastes were sited and recycled waste from the County uninicorporated area, while one of the existing facilities began recycling inert materials in 1995. The County has expanded and improved diversion programs continually.

6. If the difference between the proposed diversion rates in 4a and 4b is greater than 5 percentage points, please explain the specific reasons for the difference. (For example: new/improved curbside diversion programs.)

The County unincorporated experienced huge growth in construction activities between the time of the original base year and the new base year. Eight new construction and demolition recycling facilities that process wastes were sited and recycled waste from the County uninicorporated area, while one of the existing facilities began recycling inert materials in 1995. The County has expanded and improved diversion programs continually. The new diversion rate also is indicative of the new and expanded programs implemented under the 1066 extension.

7. Disposal Tonnage (enter values):	130,478	409,961	540,439					
	Residential Non-Residential Total							
Please select the ONE choice below that best explains your dis	posal data and complete the	required tables.						
a. All tons claimed are from the Board's Disposal Reporting System (No explanation required. Go to Section 8.)								
b. All tons claimed are from a 100 percent audit of haule	er and self-haul tonnage. (Plea	ase complete Reporting Year Tor	nnage Modification Request and					
Certification sheet found at www.ciwmb.ca.gov/LGCentral/Form	is/rytnmdrq.doc)							
c. Some Disposal Reporting System data were corrected. (Please complete Reporting Year Tonnage Modification Request and Certification sheet found at www.ciwmb.ca.gov/LG								
Central/Forms/rytnmdrq.doc)								

8. In the table below, list the summarized diversion activities and diversion data records that support your claim and are available for Board audit. (Note: the Board expects the jurisdictions to be able to provide all backup documentation, if requested.) Include type of record and location—for example, weight tickets from transfer stations. This section should capture all diversion tonnage (sheet will perform all addition calculations). If any diversion is from restricted wastes (i.e., agricultural wastes, inert solids [e.g. concrete, asphalt, dirt, etc.], white goods, and scrap metal), please identify those programs/waste types and fill out section 11. Note: Restricted waste material should not be extrapolated in non-residential waste audits. Please mark as attachment 8 all copies of survey sheets.

Note: The Board has indicated that it will be scrutinizing total source reduction amounts greater than 5% of total generation. Please be prepared to provide additional details subsantiating your claim.

claim.

Board Meeting

Agenda Item 23

June 14-15, 2005

Attachment 2b

9. Specific Non-Residential Sector Waste Audits-Top 10 Non-Residential Generators

Please complete this table for the top 10 non-residential generators that were surveyed. List each non-residential generator separately from the largest to smallest, based on total diversion tons. The audit reference number should correspond to the number given your survey sheet.

(Table will perform all calculations).

Include an attachment, marked "Attachment 9", which includes a summary of all the generators surveyed and all extrapolation calculations used to estimate the diversion rate:

- Include copies of survey sheet(s) used.
- · Include for each generator (use type of generator in lieu of specific generator name e.g., grocery store) each specific diversion activity and material type (e.g. cardboard recycling) and the associated tonnage for each diversion activity/material type, and applicable conversion factors/source.
- · If using the number of employees for your extrapolation method, include this information for each generator surveyed.
- Please order the non-residential generators, largest to smallest, based on total diversion tons.
- Also, the summary should include the generators that were selected to be surveyed, but did not respond to the survey, and the number of employees at each of these generators.
- As a comparison between disposal from the waste audits and DRS, the disposal for each generator must be included in the summary. Also, you should note if the disposal is being used for the extrapolation calculation. For each non-residential generator, the disposal must be broken out by cubic yard, and roll-off or compactor weights. If disposal was estimated for either disposal-based or employment-based extrapolation methods, please include conversion factor(s) for disposal and the source for conversion factor(s). Please provide an explanation as to how the conversion factor(s) is (are) appropriate for your jurisdiction e.g., "Study was conducted to determine average weights using hauler weight tickets."

Type of Non-Residential Generator	Audit Reference Number	Specific Diversion Activities Including Material Type (e.g. paper recycling, grasscycling). (List activities on one line)	Number of Employees	Source Reduction Tons	Recycling Tons	Composting Tons	Total Diversion Tons	Percent of Total Generation (Total Diversion Tons/Total Generation in Section 8)	Survey Method Phone (P) Mail (M) On-site (O) Other

	Totals	904	3,038.43	4,369.65	3,191.43	10,599.51	

Summarize the non-residential diversion activities for the top 10 generators quantification methodology and applicable conversion factors and sources (e.g., cardboard recycling: quantified by monthly tonnage receipts provided by the contact person at the business).

- **11.** For each restricted waste type (i.e., agricultural waste, inert solids [e.g., concrete, asphalt, dirt etc.] scrap metals, and white goods [PRC section 41781.2]) and associated program, please provide the following information:
- a. If the diversion program started on or after January 1, 1990, complete the following table.

Note: program name refers to one specific diversion program for that waste type (e.g., "diversion conducted by city public waste department.)

Restricted Waste Type	Specific Program Name	Year Started	Tonnage
Pull Down for Waste Types	See Attachment 11(Restricted Waste)		
Pull Down for Waste Types

Pull Down for Waste Types			

- **b.** If the diversion program started before January 1, 1990 and if documentation on the program and waste type has not been approved by the Board on a separate sheet marked "Attachment 11b," give the program and waste type, and provide documentation that indicates:
- How the diversion was the result of a local action taken by the jurisdiction, which specifically resulted in the diversion (PRC sec. 41781.2 [c] [1]).
- That the amount of that waste type diverted from the jurisdiction in 1990 was less than or equal to the amount of that waste type disposed at a permitted disposal facility by the jurisdiction in any year before 1990. **Note**: this criterion is applicable to the entire jurisdiction, not to individual programs (PRC sec. 41781.2 [c] [2]). Please include documentation.
- The jurisdiction is implementing, and will continue to implement, the diversion programs in its Source Reduction and Recycling Element.

Note: If documentation for a waste type and program has already been approved by the Board, you do not have to	o provide
an attachment 11b for that waste type and program.	
Instead, please provide date of Board approval of previous submitted information.)	(Date)
If documentation is not available, go to 11d.	

c. If the diversion program started before January 1, 1990, and the documentation requested in 11b is available (but not yet

approved by the Board), complete the table below for each program claimed:
